

**4 X 2 PANEL VAN, MAINTENANCE CONVERSION,  
MIN 9,200 LBS GVWR**

The maintenance conversion panel van specified shall utilize a current model year full size cargo van as defined by Standard Item 34 w/ option STDL.

This vehicle shall not have side panel windows and the interior shall be equipped with adjustable shelving, a bulkhead, and ladder racks. Curbside and the rear split type double loading doors upper section shall be furnished with safety glass. Rear and side cargo door windows shall be covered on the inside with expanded or perforated metal or 3 mm (1/8 in) wire mesh.

The bulkhead shall be constructed of not less than 17 gage steel with a rigid center section door and side panels, which shall be located between the driver and the cargo area. The door shall have openings in the upper and lower halves separated by a solid area. The openings shall be open mesh covered or perforated type. The door shall have a two-way handle, lockable from the driver's side, and shall be hinged to swing into the cargo area. Bulkhead shall be secured to the body interior with easily removable corrosion resistant fasteners. Provision shall be made on cargo side of bulkhead for relocation of spare tire assembly to left or right side panel(s) or under frame.

Shelving is furnished as standard. Shelving shall not be less than 117 cm (46 in) high and not be less than 213 cm (84 in) long on street (driver) side. Length shall not be less than 107 cm (42 in) on the curb (passenger) side and shall not block the side cargo door opening. Shelves, bins, and drawers shall be capable of supporting a load of not less than 195 kg/sq m (40 lb/sqft). Shelving shall not interfere with any access doors. Shelving shall be secured to the body interior with easily removable corrosion resistant fasteners.

Each shelving unit shall consist of 2 upright ends having 2.5 cm (1 in) flanges front and rear with shelf mounting holes on 2.5 cm (1 in) centers. Each shelving unit shall contain a minimum of 4 shelves, not less than 30 cm (12 in) deep with not less than a 13 cm (5 in) high back flange and a 2.5 cm (1 in) high front flange, except back flange on shelves supporting parts drawers. A total of 16 removable dividers shall be furnished so the second and third shelves up on the street (driver) side may be divided vertically to provide a total of 20 bins. Dividers shall have 5 cm (2 in) centers and installed in such a manner as to prevent rattling during transit. Holes shall be provided in the ends of the shelf flanges to mate with the mounting lock nuts or shake proof fasteners. Bolts of not less than 7 mm (0.25 in) in diameter with lock nuts or shake proof fasteners shall be used for assembly. An 18 drawer small part unit shall be installed on the lower shelf on both sides of the vehicle located over the rear wheelhouses. The small parts drawer units shall be of all steel construction, not less than 25 cm (10 in) high, 28 cm (11 in) deep, and 84 cm (33 in) long. Each drawer shall be provided with not less than two adjustable vertical dividers, and shall be tilted to the rear to retain the individual drawers while the vehicle is in motion.

Vehicle shall be equipped with removable overhead ladder racks. The ladder guides shall be adjustable in width. Ladder racks and guides may be installed in position on vehicle roof or may be boxed and secured inside of vehicle for shipment. When boxed, the exterior color of the racks and guides need not match the vehicle exterior color. The rear of the vehicle shall be provided with a safety-tread, steel plate with step built into the rear bumper. Step shall extend full width and shall have a step surface not less than 10 cm (4 in) deep. The height of the step shall be approximately at the normal height of the bottom edge of the vehicle's bumper.
